Professional Summary

Computer Science undergraduate with experience in machine learning, data analysis, database management, and AI agent development. Analyzed 23 million search-performance records using Python and SQL, and built LLM-powered chatbots and automated workflows for business operations.

Experience

FlyRank AI Machine Learning Engineer Intern | Jun 2026 - Oct 2026

- Analyzed 23 million search-performance records using Python and DuckDB SQL to prepare data for prioritizing pages for review.
- Compared logistic regression with a rule-based baseline on separate client data; selected the stronger rule to prioritize over 96,000 pages for review.
- Authored Before You Refresh, a capstone study documenting methods, limitations, and recommendations for investigating declines in search performance.

Solusi Prima Packaging AI Support Associate | Jun 2025 - Present

- Built an LLM-powered product recommendation chatbot with AI agent workflows in n8n, integrating Chatwoot and Qontak APIs.
- Automated CRM deal updates through an internal chatbot that accepts sales representatives' voice notes and text messages.
- Built n8n workflows and MySQL-backed trackers for customer complaints, operational blockers, and new business opportunities.

Education

Bina Nusantara University Bachelor of Computer Science | Sep 2024 - Expected 2028

- GPA: 3.86
- SASC Scholarship Tutor, School of Computer Science - Odd Semester 2025/2026
- SASC Scholarship Tutor, School of Computer Science - Even Semester 2025/2026

Leadership & Activities

Bina Nusantara Computer Club Learning and Training Activist | Oct 2024 - Oct 2025

- Led development of the C programming module, including curriculum planning, exercises, and learning materials for beginner to intermediate learners.
- Contributed to Java and introductory machine learning modules, reviewing materials with teammates for clarity and consistency.

Skills

- **Programming and analysis:** Python, SQL, pandas, DuckDB
- **Databases:** MySQL, Supabase
- **Machine learning:** scikit-learn, model evaluation, PyTorch, TensorFlow, NLTK
- **Generative AI:** LLMs, AI agents, LangChain, prompt engineering, retrieval-augmented generation (RAG), embeddings
- **Automation and integration:** n8n, API integration, chatbot development
- **Additional languages:** C, JavaScript
- **Languages:** Bahasa Indonesia - native; English - fluent
